## Overview

Our Heart and Vascular Center (HVC) is a global leader focused on prevention and treatment of cardiovascular conditions from infants to adults. With our Care Signature, every patient receives the highest standard of care at any of our many Yale New Haven Health locations.

The Heart and Vascular Center provides the full range of medical services – from diagnosis to advanced treatments and care management. Our areas of specialization include cardiac rehabilitation, cardiac surgery, cardiology, heart failure, heart rhythm disorders (electrophysiology), heart transplant, interventional cardiology, pediatric cardiology, structural heart and valve disease, and vascular medicine and surgery. HVC also offers clinical research through Yale School of Medicine.

The HVC team of highly trained Yale Medicine and Northeast Medical Group specialists represents Yale New Haven Health Heart and Vascular Center throughout our varied service areas.

Our cardiac surgery team performs procedures at Bridgeport and Yale New Haven hospitals. We have Heart and Vascular Center services in Connecticut, Westerly, Rhode Island, and Westchester County, New York. That makes it easy for you to find a doctor or service at the right time, in the right location.

Among our achievements, Yale New Haven Health Heart and Vascular Center is the first and only healthcare system in Connecticut to be certified by the American College of Cardiology for transcatheter valve replacement procedures, offered at Bridgeport and Yale New Haven hospitals. In addition, Yale New Haven Hospital is recognized as a Hypertrophic Cardiomyopathy Center of Excellence by the Hypertrophic Cardiomyopathy Association and was the first hospital in Connecticut to achieve this status.
